

# JOIN US IN ENHANCING CHEMICAL RISK ASSESSMENT!

- EFSA is seeking stakeholders with valuable monitoring and surveillance data to contribute to chemical risk assessment. Your expertise and data can help us fill critical data gaps, ensuring robust and future-ready chemical risk assessment.
- **We Need Your Data!** If you have access to relevant data or know sources for these data gaps, we invite you to join our initiative. Together, we can enhance the safety and well-being of our communities.

## Benefits for stakeholders

- Enhance **your data utilisation**.
- Increase the impact of your data by becoming an EFSA partner for chemical monitoring and surveillance data
- Identify opportunities for cooperation and exchange with other partners
- **Contribute** to public health, plant and animal health, and environmental safety.

Do you want to be a part of the solution? Do you have any of these data?

## The data needs identified:

DATA GAPS (PRIORITISATION)		Pesticides	Food additives and flavourings	Food enzymes	Food contact materials	Environmental pollutants	Processing contaminants	Biogenic substances	Feed additives
1	Occurrence data on chemicals in processed food	Dark Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
2	Occurrence of metabolites and degradation products	Dark Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
3	Human biomonitoring data	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
4	Data on combined exposure to different chemicals	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
5	Exposure data for sensitive and/or underrepresented populations	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
6	Compositional data of food and feed additives and FCM	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
7	Occurrence data from other sources of exposure	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
8	Occurrence data of novel/emerging substances	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
9	Occurrence data on authorised additives in all food categories	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
10	Data on natural occurrence of food additives in food	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
11	Occurrence data on impurities	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
12	Occurrence data of feed additives in different animal derived products	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
13	Data on production, usage and market trade volumes of chemicals	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
14	Occurrence data on chemicals in different environmental compartments	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
15	Occurrence data with better geographical representativeness	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
16	Occurrence data on chemicals in animal feed	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
17	Occurrence of chemicals in high-risk and/or not frequently consumed products	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
18	Data on pesticide use (e.g. location, volume and frequency of application)	Dark Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
19	Data on natural occurrence in feed	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green
20	Data on migration/release of substances from food contact material articles and degradation products	Light Green	Light Green	Light Green	Dark Green	Light Green	Light Green	Light Green	Light Green
21	Data on natural products used as or in food contact materials	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green	Light Green

Prioritisation position within each chemical domain (dark green for highest priority and light green for lower priority).

### Step 1

Identify and prioritise **EFSA's data needs** for advancing Human Health RA, Animal Health RA and Environmental RA of chemicals.

Monitoring and surveillance data for chemical risk assessments

Animal

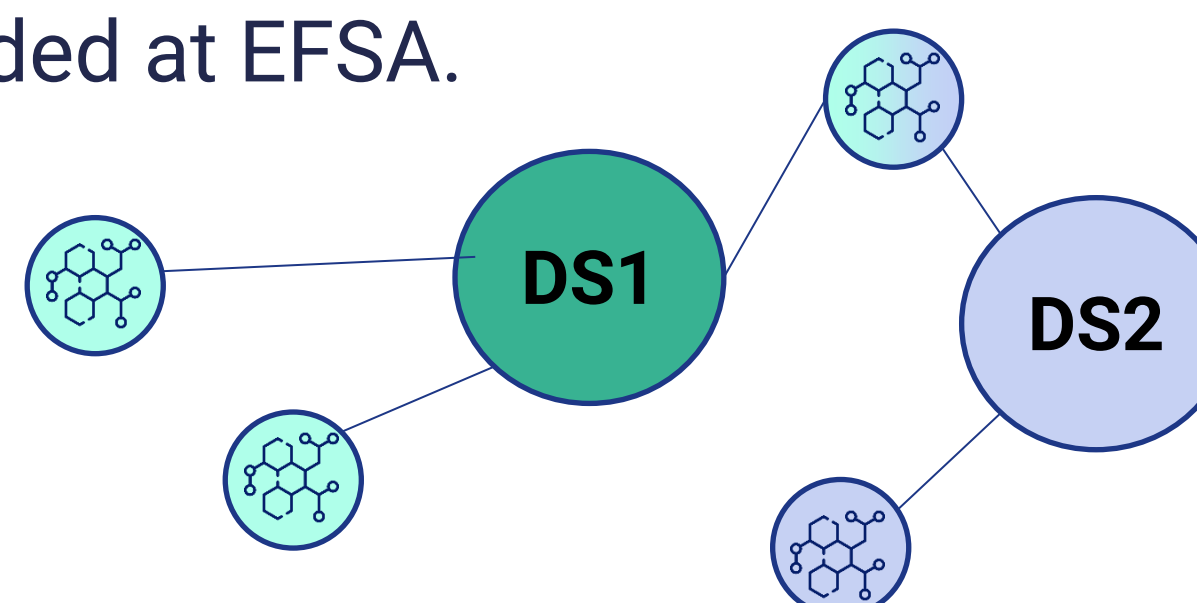

Environmental

ONE HEALTH

### Step 2

Identify, and **map relevant sources** for the prioritised data gaps needed at EFSA.

INVENTORY OF DATA SOURCES

You are here

DATA GAPS

Where are these data? Do they exist? Do you know sources for these data gaps?

### Step 3

Project will provide recommendations for data access and generation.

How to:

- Generate
- Collect
- Store
- Connect
- Share
- Harmonise
- Etc..
